NIQUAT ATAC 3016		
About	Niquat ATAC 3016 is a solution of Cetyl Trimethyl Ammonium Chloride. It is an almost water white to slightly yellowish liquid.	
Formula	$C_{16}H_{33}(CH_3)_3NCl$	
CAS No	112-02-07	
Applications	<p>Niquat ATAC 3016 has wide ranging applications as a biocide including disinfectant formulations for cleaners and as a inhibitor for microbe induced corrosion. It is especially stable in highly acidic conditions making it a superior choice to benzalkonium chloride for toilet bowl cleaner applications.</p> <p>It is also effective as a hair conditioning agent, phase transfer catalyst, cationic surfactant, antistatic and antiseptic agent.</p>	
Specifications	<i>Physical Form</i>	Liquid. It may or may not contain alcohol as solvent depending on end use.
	<i>Colour</i>	Clear white to light yellowish liquid
	<i>active Content</i>	30% w/w (higher active content solutions are also available)
	<i>pH</i>	6.0-8.0
Packing	50 kg carboy / 200 kg Drums (HDPE)
